

DeBru Ozone A-1000mg

A DeBru ozone air/water disinfection system is a portable device designed to sanitize air and surfaces by generating ozone. DeBru Ozone (O₃) is a highly reactive gas composed of three oxygen atoms, and it is known for its strong oxidizing properties.

Benifits :

- Removes Pet smell
- Effective Air Purification
- Portable and Versatile
- Rapid Disinfection
- Eliminates Odors
- Chemical-Free
- Complements Cleaning Protocols
- Convenient Maintenance
- Improves Indoor Air Quality

Ozone molecules

- **Deodourisation**
- **Disinfection**

Bactericide

Virucide

Fungicide

Applications:

- All small requirement of ozone
- Water disinfection
- (baby)clothing disinfection
- Vegetables & fruits sanitization
- Room disinfection
- Healthcare Facilities
- Hotel Rooms
- Restaurants and Food Service
- Personal Use

Size(h.w.d):300*180*90
